AND THE CADILLAC "EIGHT" STANDS ALL ALONE.

Do you wish to know how good a car this new Cadillac is?

Follow your own thoughts.

You will find that you are thinking what the nation is thinking.

Look back a little bit.

A few years ago the storm raged around the Cadillac.

A dozen or more cars sold at approximately the same price.

All claimed equality with the Cadillac.

The Cadillac field was the coveted field—because it was a quality field.

These dozen or more cars struggled to find a place in it, because they were eager to share in Cadillac success. And now, how do things stand?

A limited market above the Cadillac in price—and a large market below.

And in the center, as solid as a rock, the great Cadillac clientele—greater, and stronger, and more solid than ever.

When you search for a car to compare with a Cadillac do you look downward?

It is not likely.

And yet many a man in past years has thought that he was buying a car as good as the Cadillac, because he was paying an approximate price.

He cannot think that now, because these cars have removed themselves from the Cadillac field.

The storm that once raged around the Cadillac still rages—but it is in another zone. The Cadillac is out of it, and above it.

In its own great quality class the Cadillac stands alone—all alone.

The Cadillac owner does not believe that its equal exists.

And if you are looking for its equal—where will you look?

You must first find a car of equally fine construction.

If you search for equality with the Cadillac, where else will you find such workmanship?

Again—in your search for a car equal to the Cadillac, you must find a car of equal experience in V-type engine construction.

The Cadillac has brought the V-type principle to a state of comparative perfection in the building of 13,000 V-type eight cylinder cars in 1915.

Where will you look for a like experience—for equal certainty—for such positive insurance?

What is the utmost you desire in a car?

Your friend who owns a Cadillac already has it.

In freedom from gear shifting, in ease of control, in swift acceleration, in hill climbing ability, in comfort and luxury, in all the things which contribute to ideal motoring, the Cadillac owner will tell you that he has them in superlative degree.

In his mind—in your mind—in the mind of the nation—is not the standing of the Cadillac absolutely fixed? In all the things which constitute quality—the highest known quality—is it not universally accepted as a standard? Your choice therefore, is rendered simpler than ever before. You are freed from the distraction of many claims of equality which may once have confused you. You know what the Cadillac offers: Engineering pre-eminence, and social pre-eminence, unequaled V-type experience, the enthusiastic indorsement of 13,000 owners, mechanical construction representing the highest type of fine manufacturing extant, and an established record of luxury, long life and endurance. We repeat you **know** that you get these qualities in the Cadillac. Where else could you get them?

HOW BIG A SILO SHALL I BUILD?

Allow 40 pounds of silage per day for each mature cow and half this amount for each head of young stock.

Figure on feeding the silage for about 200 days each year.

From the accompanying table find the dimensions of the structure that will hold the total quantity needed. The figures are based on silos that have been filled with well matured corn, which has been allowed to settle forty-eight hours, and then refilled.

The deeper the silo in relation to its diameter and the tighter and better it is built, the smaller the allowance that must be made for spoiled material. In any case it is wise to build a bigger silo than you absolutely need to allow for shrinkage, an unexpectedly long season and a possible increase in the size of your herd.

The cost of filling will vary with the degree of system employed, the distance of hauling involved, the quality of labor, etc. From records kept on nineteen Illinois farm, it was found to vary from forty to sixty-seven cents per ton, with an average of fifty-six cents.

RULES FOR JUDGING.

1. The deficiency in length of all ears not conforming to the standard for the variety, shall be added together, and for every inch thus obtained, a cut of two points shall be made. In determining the length, measure from the extreme tip to the extreme butt.

2. The deficiency in circumference of all ears not conforming to the standard of the variety, shall be added together, and for every inch thus obtained, a cut of two points shall be made. Measure the circumference one-third the distance from the butt to the tip of the ear.

3. In determining the proportion of corn to cob, weigh each alternate ear in the exhibit. Shell and weigh the cobs, and subtract from the total weight of ears, to get the per cent of corn. For each per cent short of the standard for the variety, a one-point cut shall be made.

4. In judging color, a red cob in white corn or a white cob in yellow corn, shall be cut 10 points. For one mixed kernel, a cut of one-fifth of a point shall be made; for two, two-fifths of a point; for three, three-fifths of a point; for four, four-fifths of a point; for five or more, a one-point cut shall be made. Kernels missing from the ear shall be counted as mixed at the discretion of the judge. Difference in shade of color of grain or cob shall be scored according to variety of characteristics.

HOW MUCH HAY IN A RICK? IN A STACK?

(From Circular 131, Bureau of Plant Industry, U. S. Department of Agriculture.)

To find the amount of hay in a rick:

(1) Find its cubic contents by multiplying together

a. The length of the rick. *b.* Its width. *c.* Its "over" or the length from the ground on one side across the top to the ground on the other side.

(2) Divide this product by the number of feet in a ton which may be estimated as follows:

After standing in stack 30 days or less—589.6 cu. ft.

After standing in stack 30-60 days—581.5 cu. ft.

After standing in stack 74 days or more—514.9 cu. ft.

The quotient will be the amount in tons.

To find the amount in a round stack:

(1) Find the cubic contents of the upper portion, by multiplying together

a. The height of this portion.

b. Its lowest circumference, squared (i. e. multiplied by itself.)

(2) Find the cubic contents of the lower portion by multiplying together corresponding figures.

(3) Add the two products together and divide by the number of cubic feet in a ton as given above.

A WORD ABOUT YOUR FEATHER PILLOWS

What is more unsanitary than a feather pillow?

You cover the pillow regularly with a nice clean pillow-case, but the pillow itself is rarely if ever properly cleaned.

Yet on account of the animal matter of which it is made it really requires regular and thorough cleansing.

We wash your feather pillow without removing the feathers and dry them with pure fresh air, and the constant agitation in our new sanitary dry tumbler which thoroughly dries and sterilizes every feather and renders the pillow soft and fluffy.

SPIRIT OF CO-OPERATION.

Chamber of Commerce Working for Champaign County.

In taking up work outside the city limits, the Chamber of Commerce of Champaign, Illinois, has no desire to encroach upon the provinces of those who are to be effected. There is no belief that residents of the rural community are not aware of their duties or needs, nor do we believe we can perform their work more effectively than they.

It is our belief, however, that residents of the city owe certain duties toward our neighbors on the farms, and any advance we make is with the wish that we may be of assistance in some way in securing for our friends some of the conveniences to which they are entitled.

With a desire to act only in a co-operative way in work outside our city limits, this association has an agricultural committee, sub-divided to cover various phases of country life, which is placed at the service of our friends whose business, agriculture, is recognized as being one of the most important in our county.

We expect to call on our friends at times for assistance in work which affects all, and feel that we should be prepared to respond to any such demand which may be made upon us.

Each of us can do much toward developing this spirit of co-operation by understanding it.

Yours for Champaign County,
CHAMBER OF COMMERCE

BIGGER PROFITS FROM EACH ACRE

Grasp the opportunity now to make your farming more profitable. Make each acre of your land yield you biggest profits—increase your production and at the same time reduce its cost. This cannot be accomplished by working your farm with animal power and hired help. You know that this method of farming is costly and unreliable. You know that many a time the past season you could have used more power—more help. You know that there is always a right time to plow, to sow and to reap. You know that just as long as you are dependent on horses you'll not get this work accomplished at just the right time. Why remain in this old rut? Why not reap the maximum results from your farm? You should know by this time that there's a better way, a cheaper way and a more profitable way to farm. Wide-awake farmers everywhere are learning that by working their farms with an old reliable

AULTMAN-TAYLOR GAS TRACTOR

means bigger and better crops—less expense in raising them—less hard work. The first cost of an Aultman-Taylor Gas Tractor may appear a little high, but stop and figure—the number of horses required to do the same work would cost you considerably more. Then, too, horses are liable to die or become crippled. Aultman-Taylor Gas Tractors are always reliable—can be repaired in case of accident—cost nothing when standing idle and are good for years and years of hard service. Think this matter over! It means money to you. Power farming is here to stay—it's a success. Sooner or later you'll farm this modern, money-making way. Better start today—you'll be money ahead. The Aultman-Taylor Tractor is the tractor you want—it's the tractor that never fails to make good. Aultman-Taylor Gas Tractors burn gasoline or kerosene with remarkable economy. See to it that you see an Aultman-Taylor before you buy. Let us send you our catalog.

PLUMBING THE CARSON-PAYSON CO. HEATING
REPAIR WORK GUARANTEED
319 N. Neil St. BELL 299 AUTO 1084

T. A. BURT OTIS M. GREEN.

THERE IS A REASON

Our established acquaintance throughout Champaign County especially with the FARMER need not be questioned. We have sold them ILLIONIS and MICHIGAN farm lands with much satisfaction to them and ourselves, and all have made good.

We have made FARM LOANS to equally as many farmers who have been satisfied customers ever since.

We have written LIFE INSURANCE for them in the oldest American company, viz: The Mutual Life of New York.

We have cared for their FIRE INSURANCE in Old and Reliable Companies and PAID all losses promptly.

We have written SURETY BONDS for them in order that they might avoid the embarrassment of asking some friend to go their security, which made them independent.

We will be very glad to consult with you at any time, and it matters not whether it is to sell your Farm, make a Farm loan for you or write your Farm Fire insurance, but before you decide on a Life Insurance Policy we insist on you getting the proposition of the Mutual Life Insurance Company of New York.

Either write us or call us on the phone for appointments.

PUBLIC OPINION.

That a LAUNDRY consists of a lot of wheels, chains, hot irons and other apparatus to tear up clothes.

This is given out by people who never saw the inside of a LAUNDRY.

Do you realize that the LAUNDRY industry today employs the fourth largest pay roll in the United States, and ranks seventh in investment? Then why should we not have machines to do your work properly? We have, and have machines that are easier on your goods. Why? Because they press and are heated by steam, so there is no chance for scorching. The farmer today is connected with the LAUNDRY by PARCEL POST. Why should his wife have any more drudgery than the city wife who sends us her family wash? We do it for six cents per pound rough dry. All flat pieces ironed, others starched ready to iron.

Give the mail man your bundle with address below and he will return it to you in fine shape. TRY HIM.

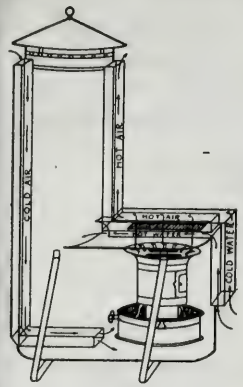
What Every Farmer and Stock Man Should Have



The Trisler Siphon Heater

One of the latest devices in stock tank heaters. The TRISLER SIPHON HEATER does away with the ashes and dirt around your tank. It keeps the water in circulation at all times and is the only heater on the market that has a siphon connection. It costs about 10 cents a week in cold weather to keep your tank free from ice.

THE TRISLER SIPHON HEATER is sold under a positive guarantee. Write for prices. We also manufacture a full line of steel tanks & hog troughs. We handle all kinds of sheet metal roofing, eave spouting, down spouting, and etc. All mail orders promptly attended to. Our prices are factory prices olny.

The Twin City Abstract Company
(Not incorporated)
320 N. Hickory Street, Price Bldg.

WITH the most complete set of books in the county, and using the card index system we are able to render the most efficient abstracting service possible to obtain. Our large acquaintance with land titles and former owners of land, and the fact that we are the oldest abstractors in this county, we are prepared to furnish abstracts at the shortest possible notice and at the lowest current rates.

We solicit money for investment in real estate securities, paying six per cent and seven per cent interest.

REPAIR WORK GUARANTEED
319 N. Neil St. BELL 299 AUTO 1084

In work calling for a high degree of skill and in which there is something at stake which you prize highly. No half-way business goes—you secure the best doctor, lawyer, dentist or specialist.

Real property is a large branch of the law and a difficult one. It has to do with the vast wealth of this country.

You cannot afford to take any chances with the title to your farm or lot. Demand the best Abstract of Title and secure an opinion by the best title attorney.

You will be convinced that OUR ABSTRACTS OF TITLE ARE THE BEST, if you will investigate.

THE REASON: (1) Our 2 sets of books are the best. (2) Our 4 abstractors are the best. *Demand the best.*

Fisher, Illinois

Fisher is a prosperous town of eight hundred fifty inhabitants, located in the northwestern part of Champaign County, on the LeRoy and West Lebanon branch of the Illinois Central railroad. It is in a very fertile farming country and enjoys a thriving trade from the surrounding territory. It has six general, two hardware, one drug, one furniture, and three implement stores, harness shop, two blacksmith shops, garage, lumber dealer, two tonsorial parlors, two grain elevators, two newspapers, two banks, three restaurants, large poultry house, etc. It has three substantial church buildings, and one of the finest school buildings in the county, with a splendid graded and recognized high school system, with a four-year course. It has splendid homes, progressive business men, and a citizenship of the highest type. The Community Welfare Association of Fisher, Illinois, was organized recently with over forty members, composed of business men and farmers of the community, which has for its aim the promotion of all that is calculated to make a better town and community, in the social and commercial realm.

Fisher and community have many miles of good oiled roads and are adding to the same each year.

YOURS FOR SQUARE DEALING.

A COAT or two of good paint gives property a new lease of life. Nothing helps more to give a house class, nothing helps more to keep it sound, nothing contributes more to the self-respect of the people who live in a house than keeping it well white-leaded. We recommend paint made of

Dutch Boy White Lead

and pure linseed oil, tinted to suit. It spreads well, covers well, looks well, wears well.

Come in and talk paint, look at color schemes, ask advice, get estimates. We carry a full line of wall paper, paint and painters' supplies. If you can't come, write or ring.

Yours for Square Dealing. 335 N. Walnut St. Champaign, Ill.

Is Your Farm Spick and Span?

Lumber is growing more and more expensive every year. Don't let valuable buildings go to pieces for a little paint. Keep your farm buildings spick and span with Moore's Paints.

MOORE'S Roof and Barn Paints

There is no better paint than Moore's House Colors, for better paint cannot be made. Your dealer probably has them. If not, write to us.

MOORE'S Paints and Varnishes for every Purpose.

Don't fail to use MURESCO to brighten and beautify your rooms.

Write for descriptive literature.

CHAMPAIGN COUNTY BUYERS' GUIDE

A classified list of Champaign County's business firms. Those found in this Guide probably need no further introduction from the publishers. We desire, however, to remind the recipient of this Directory that the business houses herein contained are your home concerns. They are as near you as your phone or mail box. They are, to a large degree, responsible for the prosperity and well being of the community. When considering making a purchase of ANYTHING, remember it can be found in Champaign County. Consult this Directory for dealers, then patronize them. They stand behind their goods.

Respectfully,
CLARK & ELWELL, Publishers.

AUTOGRAPHIC KODAK

Is the latest thing in Cameras. You WRITE IT ON THE FILM when you take the picture, thus making a permanent record.

We can put the attachment on YOUR OLD KODAK.

WHO does your FINISHING?

Pictures that are worth TAKING are worth MAKING. We make them for you as carefully as though they were our own, in the LLOYDE PHOTO FINISHING LABORATORY.

When in Need of Shoes or Hose

Remember the old reliable place that stands for quality and honest treatment. SHOES FOR THE WHOLE FAMILY. We have our Shoes made to order. They come direct from the factories to us, which means one freight and one profit, where the small stores buy from jobbers, which means two freights and two profits.

We also have a large stock of guaranteed Hose. Our price is as low as anyone in the county for the class of goods. Give us a trial and be convinced that this is the place to deal.
